

TECHNOSYS SERVICES

The Training & Placement Cell of Buddha Institute of Technology successfully organized a campus placement drive in collaboration with Technosys Services, a reputed IT company known for its expertise in cloud-based solutions, enterprise services, and software development.

The drive witnessed enthusiastic participation from students of B.Tech (CSE and allied branches), BCA and MCA, providing them with an excellent platform to explore career opportunities in the IT sector. The recruitment process began with a Pre-Placement Talk, where company representatives introduced students to the organization's work culture, technical domains, and expectations from candidates.

The selection process comprised multiple stages, including:

Aptitude Test

Technical/Coding Round

Personal Interview

Students demonstrated strong technical knowledge and problem-solving abilities throughout the process. The drive concluded with the shortlisting and selection of deserving candidates for roles such as Software Developer and related profiles.

Overall, the placement drive was conducted smoothly and proved to be a valuable opportunity for students to begin their professional journey. The initiative reflects the institute's continuous efforts to strengthen industry-academia collaboration and enhance employability among students.
